Art Unit: 3654

Applicant's election without traverse of Group I invention, claims 1-9, in the reply filed on 12/13/04 has been acknowledged.

Claims 10-34 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 12/13/04.

The amendment filed 4/12/05 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: "substantially contiguous".

Applicant is required to cancel the new matter in the reply to this Office Action.

It appears that "cylindrical drum" and "drum" (claim 1, 4, and 35) should be --take-up roller--.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1, 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schulze (US-4004747) in view of Rundo (US-4477036).

Art Unit: 3654

Schulze discloses the well-known process of web slitting and winding of the slitted webs. Rundo has been advanced in the previous Office action. It would have been obvious to a person having ordinary skill in the art to provide the apparatus of Schulze with a diverter system 25 as taught by Rundo multiplied accordingly to accommodate the number of strips to reciprocally move the strips laterally as the strips are wound.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Schulze in view of Rundo as applied to claim 1 and 6 above, and further in view of Javery et al (US-2682378).

Javery et al has been advanced in the previous Office action and that rejection is incorporated by reference to apply to the apparatus of Schulze modified as above.

Claims 4, 7, 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 35-39 are allowed (It appears that "cylindrical drum" and "drum" (claim 1, 4, and 35) should be —take-up roller—).

The drawings are objected to because at least reference numeral 82 is not shown in figs. 5 and 18-28. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the

Art Unit: 3654

application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection necessitated by the change in lines 2-3 of claim 1.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

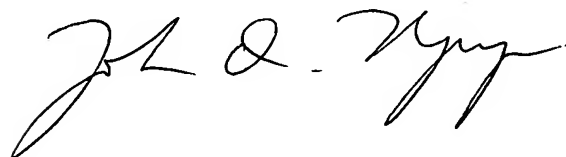

Art Unit: 3654

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
